

ENERGY MANAGEMENT SYSTEM POLICY

As IC İttaş Zafer International Airport Investment and Operation Inc., we aim to be a leading and respected global company that provides high-quality service in international airport management with an environmentally and human-centered approach, and that is committed to continuous improvement in the sector within the framework of international standards.

In line with this, while contributing to Türkiye's 2053 net-zero emissions and green development goals, we commit to the following:

- ✓ To comply with all applicable legal requirements and other obligations to which we are subject regarding energy efficiency, energy use, and energy consumption,
- ✓ To continuously improve our energy performance and Energy Management System (EnYS),
- ✓ To conduct the necessary controls and carry out improvement initiatives to monitor and reduce greenhouse gas emissions resulting from our energy consumption,
- ✓ To monitor and evaluate the impacts of our services on energy performance, to minimize adverse effects, and to implement energy-efficiency-focused conservation measures,
- ✓ To contribute to the sustainable use of natural resources by ensuring efficiency in energy consumption,
- ✓ To set objectives and targets for energy management, and to provide all necessary information and resources to achieve these targets,
- ✓ To support energy-efficient solutions in purchases affecting our energy performance, and to incorporate energy performance and life-cycle cost into procurement decisions,
- ✓ To support design activities aimed at improving energy performance in new and renovation projects to be implemented across our facilities, equipment, or processes.
